5 Courses

Averaged-Switch Modeling and Simulation

Techniques of Design-Oriented Analysis

Input Filter Design

Current-Mode Control

Modeling and Control of Single-Phase Rectifiers and Inverters

University of Colorado Boulder

Nov 19, 2025

Prof. Dragan Maksimovic

Jacob Murphy

has successfully completed the online Specialization

Modeling and Control of Power Electronics

In this Specialization, learners developed skills of design-oriented analysis and modeling of closed-loop controlled switched-mode power converters, including averaged-switch modeling and simulations, input filter design, peak current-mode control, averaged current-mode control, as well as the design of control loops in power factor correction rectifiers and inverters.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
